Africa's First Decentralized Crypto Index Fund | Live on BNB Chain Mainnet

NAV per Token	Total Supply	Raise Target	Expense Ratio
\$0.03	100,000,000 TCIF	\$5,000,000	0.15% Annual

## THE OPPORTUNITY

Over 350 million Africans lack access to formal financial services, while the African Diaspora sends \$90B+ annually in remittances through expensive intermediaries. The global crypto market exceeds \$2.5 trillion, yet no accessible index fund product exists for African and Diaspora investors. TCIF bridges this gap with a single BEP-20 token providing instant exposure to 15 major crypto assets, eliminating the need to manage multiple wallets, exchanges, and rebalancing strategies.

## WHAT IS TCIF

TCIF is a decentralized index fund built on BNB Smart Chain. One TCIF token represents a diversified basket of 15 crypto assets spanning large caps (BTC, ETH, BNB), mid caps (ADA, DOT, NEAR), and high growth opportunities (AXGT, HASHAI, ANLOG). Token value appreciates as the underlying portfolio grows, tracked by a real time NAV Oracle updated every 15 minutes.

## PORTFOLIO COMPOSITION

Core Holdings (60%)	Growth Holdings (40%)
BTC, ETH, XRP, BNB, ADA, NEAR, DOT, ICP, ONDO, FET	AXGT, WEL, CURES, HASHAI, ANLOG
Established assets with deep liquidity and proven market cycles	Early stage projects with higher growth potential, subject to illiquidity discounts of 20% to 60%
